

# POOL DRAINS

## **What do pool drains do?**

Pool drains pull water into the filtration system so it can be cleaned and returned to the pool.

## **Why can pool drains be dangerous?**

Swimmers can get stuck on a drain in deep water and not be able to get to the surface.

## **What two rules should you follow related to drains?**

- Don't swim or play around pool drains.
- Don't swim in a pool that is missing drain covers.
